

Test Plan

Project Information

Project Name: E-Commerce Application

Document Version: 1.0

Prepared By: Mzoon Bin Shari

Date: July 2026

1. Objective

The objective of this test plan is to verify that the E-Commerce web application functions correctly and meets the specified business and functional requirements. The testing process aims to identify defects before deployment and ensure a reliable user experience.

2. Scope

The following modules are included in testing:

- Login
- Product Search
- Product Details
- Shopping Cart
- Checkout

The following are out of scope:

- Performance Testing
- Security Testing
- Compatibility Testing with legacy browsers

3. Test Strategy

The following testing types will be performed:

- Functional Testing
- Smoke Testing
- Regression Testing
- UI Testing
- Validation Testing
- Negative Testing

4. Test Environment

- Operating System: Windows 11
- Browser: Google Chrome
- Application Type: Web Application

5. Test Deliverables

The following documents will be produced:

- Test Cases
- Bug Reports
- Test Summary Report

6. Entry Criteria

Testing will begin when:

- The application build is available.
 - The testing environment is ready.
 - Functional requirements have been reviewed.
-

7. Exit Criteria

Testing will be completed when:

- All planned test cases have been executed.
 - Critical defects have been resolved.
 - Test Summary Report has been completed.
-

8. Risks

Potential risks include:

- Requirement changes during testing.
 - Delays in defect resolution.
 - Environment instability.
-

9. Test Summary

A total of 14 test cases were prepared covering the Login, Search, Shopping Cart, and Checkout modules.

The testing process identified multiple defects, which were documented in the Bug Report document.
